iNet Strategy Attains Gold Certified Partner Status In Microsoft Partner Program

iNet Strategy, Inc. Further Distinguishes itself by earning multiple Microsoft Competencies

Nashville, TN February 12, 2006 iNet Strategy, a Nashville TN Innovating Technology Solution Specialist Provider, announced today that it has attained Gold Certified status in the Microsoft Partner Program with multiple competencies in Business Intelligence Solutions, Networking Infrastructure Solutions, Information Worker Productivity Solutions and Small Business Specialist Solutions, recognizing iNet Strategy's expertise and total impact in the technology marketplace. As a Gold Certified partner, iNet Strategy has demonstrated expertise with Microsoft technologies and proven ability to meet customers' needs. Microsoft Gold Certified Partners receive a rich set of benefits, including access, training and support, giving them a competitive advantage in the marketplace.

iNet Strategy is an established full-service information technology provider offering a framework for end-to-end solutions, strategy to implementation and support. With a wide range of services that includes Network Services, Web Design, Web Application Development and Integration, e-Business Consulting, Communication Services and a full Managed Hosting product line. iNet Strategy is comprised of highly skilled technology consultants, software engineers and creative artists that are dedicated to leveraging the latest technologies to build solutions that meet business needs today and in the future.

"We are pleased to have attained the highest level of Gold Certified status in the Microsoft Partner Program. It is nice being recognized for our commitment to the various Microsoft technology products and platforms. Additionally, having this certification demonstrates to our clients that we know and understand the systems used by their companies," said Robert Morris, President/COO. "This will also allow us to greatly enhance the Microsoft solution offerings that we provide for our customers."

"Customers are looking for partner companies that can bridge the gap between their business demands and technology capabilities. They need to trust in someone who can act as an expert adviser for their long-term strategic technology plans. Microsoft Gold Certified Partners, which have certified expertise and direct training and support from Microsoft, can build a positive customer experience with our technologies," said Allison Watson, Vice President of the Worldwide Partner Sales and Marketing Group at Microsoft Corp. "Today, Microsoft recognizes iNet Strategy, Inc. as a new Microsoft Gold Certified Partner for demonstrating its expertise in providing customer satisfaction with Microsoft products and technology."

As one of the requirements for attaining Gold Certified Status, iNet Strategy had to declare a Microsoft Competency. Microsoft Competencies are designed to help differentiate a partner's capabilities with specific Microsoft technologies to customers looking for a particular type of solution. Each competency has a unique set of requirements and benefits, formulated to accurately represent the specific skills and services that partners bring to the technology industry.

Competency: Networking Infrastructure Solutions

Microsoft Gold Certified Partners enrolled in the Networking Infrastructure Solutions Competency have proven their competency in implementing technology solutions based on either the Microsoft Windows Server™ 2003 or Windows® 2000 Server operating system, with a particular focus on Microsoft Small Business Server 2000 and Windows Small Business Server 2003. These implementations may include crafting solutions that connect Windows-based servers, PC locations and the Internet, installing a server farm, or building a small-business Windows Server stand-alone solution that includes file and print capabilities.

“We place tremendous value on our partners, who help us deliver solutions and applications to customers,” said Allison Watson. “Solutions Competencies provide an integrated partnering framework that recognizes an enterprise’s expertise and rewards it for the effect it has in the technology marketplace. It also allows companies to demonstrate for customers their knowledge of building solutions based on Microsoft technologies, such as setting up networks using Windows Server 2003 and Windows Small Business Server 2003.”

Competency: Information Worker Productivity Solutions

Designed to provide additional benefit and support to partners specializing in collaboration, portals and other productivity solutions, the Information Worker Productivity Solutions Competency is utilized by Gold Certified Partners that provide their customers with solutions built on familiar programs that enable them to better manage, prioritize and collaborate on increasing volumes of information. Partners that have obtained the Information Worker Competency can help their customers realize increased service revenues and new market opportunities.

“Partners play a critical role in delivering solutions and applications to customers with the Microsoft Office System,” said Jeff Raikes, Group Vice President of Productivity and Business Services at Microsoft. “The value of Solutions Competencies is that they enable Microsoft to deliver resources and training to partners that are meeting their customer needs. And for partners, the opportunity to highlight their expertise to customers is tremendous in the growing IW solution market.”

Competency: Integrated E-Business Solutions

The Microsoft Integrated E-Business Competency is designed for Microsoft Certified and Gold Certified Partners with proven proficiency in implementing and deploying server-based portals for driving Internet commerce and business applications using Microsoft tools and software. Delivering the high levels of reliability and availability required of business-to-customer Web sites requires not only great technology but also the competency to plan, deploy, support and migrate those solutions. Microsoft Gold Certified Partners enrolled in this competency have demonstrated knowledge of, and experience with, the deployment of Internet-based solutions and infrastructure using Microsoft tools and software.

“Partners play a critical role in delivering solutions to our customers that complement their applications and services,” said Ted Kummert, Corporate Vice President of the Business Process and Integration Division at Microsoft. “The value of Solutions Competencies is that they allow Microsoft to deliver resources and training to partners, enabling them to better meet the needs of their customers.”

The Microsoft Partner Program was launched in December 2003 and represents Microsoft’s ongoing commitment to the success of partners worldwide. The program offers a single, integrated partnering framework that recognizes partner expertise, rewards the total impact that partners have in the technology marketplace, and delivers more value to help partners’ businesses be successful.
